POPULATION: STATES

As complete records of interstate migration are not available, the estimated State populations since 30th June, 1961, are approximate and are subject to revision when the actual population of each State is ascertained at the next Census. For some States such revisions, in the past, were substantial.

VALUE OF RETAIL SALES IN AUSTRALIA(a): COMMODITY GROUPS

(Figures are on a basis comparable with the 1961-62 Retail Census)

The figures in the table below relate to retail sales of goods (as distinct from services, repairs, accommodation, entertainments, meals, etc.) by establishments which normally sell goods by retail to the general public from shops, rooms, kiosks and yards. Hotels, garages and service stations are also included in respect of goods sold, but establishments such as clubs and guest houses are entirely excluded. Figures for the years 1956-57 and 1961-62 are derived from censuses taken in respect of those years, whereas other figures are estimates made by means of sample surveys.

WHOLESALE TRADE

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. With certain specified exemptions, goods sold by wholesale in Australia including imports, are taxable. The returns do not relate to all wholesale trade, as vendors trading only in exempt goods are not required to furnish returns. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degrees. Insufficient information is available to enable adjustment to be made to the crude figures on this account.

WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX

Commodities in this index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from manufacturers and merchants. With a few important exceptions they are from Melbourne sources. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.

(Base of each Index: Average of three years ended June, 1939 = 100)

PRICE INDEXES: VARIOUS COUNTRIES

Source: *Monthly Bulletin of Statistics* of the Statistical Office of the United Nations

The index numbers show fluctuations in prices in each country and do not measure relative price levels as between countries.

A short dash on each side of an index number (e.g., -95-) indicates that two series have been linked at that period. A line between two index numbers indicates that it is not possible to link two series (because of change in scope, etc.) and therefore the index numbers are not comparable with each other even though they are shown on the same base period.

WHOLESALE PRICE INDEXES

SHARE PRICE INDEX

This index relates to ordinary shares of the principal companies (excluding banks) listed on the Sydney Stock Exchange, whose business in New South Wales is extensive. The prices of individual shares are unweighted and each group average is the mean of the average monthly prices per £1 of paid-up capital. Adjustments are made for changes in the capital structure of the companies. The total index is the average of all the shares included in the groups with the addition of thirty-four miscellaneous shares.

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, payments made in advance or retrospectively during the periods specified, etc. (b) Total wages and salaries, etc., divided by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. As it was not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used for each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

(c) Includes the Australian Capital Territory. (d) Includes the Northern Territory. (e) See page 2 for a seasonally adjusted index.

NOTE.—Quarterly figures are affected by seasonal influences. Comparisons as to trend should be made for complete years or corresponding periods of incomplete years. However, from December quarter, 1963, comparisons with corresponding quarters of earlier years are affected by additional prepayments arising from extensions of annual leave from two to three weeks.

INDUSTRIAL PRODUCTION INDEXES: VARIOUS COUNTRIES

Unless otherwise stated, the indexes shown below include mining, manufacturing, electricity and manufactured gas but exclude construction. When the indexes are adjusted for differences in the number of working days per month or for seasonal variations they are footnoted accordingly. A short dash on each side of an index number (e.g., -95-) indicates that two series have been linked at that period.

(a) Figures for N.S.W. represent combined transactions of Consolidated Revenue Fund and Business Undertakings—Railways, Tramways, Omnibuses and Sydney Harbour Trust Section of Maritime Services Board—included in annual Budget Papers. Adjustments have been made to exclude duplications. (b) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals have been adjusted to exclude State payment to the Commonwealth in respect of pay-roll tax and Commonwealth payments to the States included in State Consolidated Revenue Funds in respect of States grants (financial assistance), the interest on State debts, special grants, special financial assistance, grants to universities, tuberculosis capital expenditure and National Welfare Fund payments. There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated.
